12. Troubleshooting

Continuous crackling noise

- To obtain perfect sound quality, please don't take earphone away too much from mobilephone..

Unable to hear any sound

- Press the Volume + button on the headset to increase the volume.
- Ensure your headset is properly paired with the mobile phone.
- Ensure the headset is connected to the mobile phone. If the headset is not connected to the phone via the Bluetooth option, please follow the pairing process to connect them. For details, refer to the part "Pairing the Headset" in this manual.

Unable to connect

The pairing settings between your headset and mobile phone may be deleted. Follow the part "Pairing the Headset" in this manual to pair them again.

Can this device apply to other Bluetooth devices?

- MH-806 Bluetooth headset is designed to pair Bluetooth mobile phones. In addition, it is compatible with Bluetooth Version 1.1, Version 1.2 or 2.0 and supports operations upon other Bluetooth devices.
- Some functions, such as "Rejecting a call", "Redialing", or "Voice dialing", are only available while supported by your mobile phone. Please check the phone manual for further information.

13. Maintain your earphone

- Store the device after it is power off. Keep it away from extreme temperature (45°C/113°F above, including direct sunlight or -10°C/14°F below) for storage. Otherwise it may shorten the service life of the battery and harm the operation.
- High temperature may also damage the product performance. If the device contacts water or other liquids, wipe away the water stains on the device.

14. Protect your hearing

Safety guide

The headset is able to provide extreme high volume and sharp tone. Exposure to such a sound may cause permanent hearing impairment. The volume level may differ due to your phone settings, the answering and volume settings, and the environmental factors. Before using this device, please read the safety guide below.

Perform the following steps before use:

- Minimize the volume before wearing the headset. Then, adjust the volume to a proper level slowly after you wear it.
- During operation, keep the volume as low as possible. Avoid using the device in noisy surroundings, as you may have to increase the volume. If you have to increase the volume, control the speed for volume adjusting.
- If you feel uncomfortable or a drumming in your ears, stop using the headset and seek medical assistance immediately.
- Continuous exposure to high volume may have you adapted to the volume level. This may result in permanent hearing loss without causing discomfort.
- **Warning**
- Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.
- If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
 - Reorient or relocate the receiving antenna.
 - Increase the separation between the equipment and receiver.
 - Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
 - Consult the dealer or an experienced radio/TV technician for help.
